Pellagra Increasing.

Pellagra is spreading in the United States and in the six years it has been known to medical authorities has claimed not less than 30,000 victims with a fatality rate in excess of 40 per cent., according to a report of the public health service yesterday.

Kentucky had 531 cases and 220 deaths.

The figures show pellagra either prevalent or sporadic in the greater part of the United States, but particularly serious in the South.
